WARNING

The HD/SDI Video input connector is 75 Ohms. Make sure that the video cable(s) are fitted with 75 Ohm connectors.

The illustration on the right is the correct BNC connector.

Failure to do so will damage the BNC connector on the Pico and Pico Plus transmitters. The customer is liable for any damages for not adhering to this practice.

PICO PLUS TRANSMITTER MENU GUIDE

Apply power to the unit; turn on power switch, start up sequence will start.

CANCEL/BACK
BUTTON

DISPLAY SCREEN

SCROLL/
CONFIRM BUTTON

To select a menu header, press the joystick button on the right of the LED display and then using the joystick controller scroll through the menu headings: STATUS / CONFIG RF / CONFIG VIDEO / CONFIG AUDIO / CONFIG DATA / PRESET / PATTERN GENERATOR / UNIT. Select by pushing right joystick button, scroll, push to highlight selection, and then scroll to desired setting. Push right button again to confirm setting.

STATUS

By selecting the "Status" menu, you can use the right joystick button to scroll down and see the parameters the Pico Plus; (Band / Constellation / FEC / Guard Interval)

Scrolled down

Press left button to return to main menu selection, scroll down to next menu using the right joystick button.

CONFIGURATION MENUS

There are four menus: RF / VIDEO / AUDIO / DATA By pressing the right joystick button and scrolling down, you can select which menu you want to see. By pressing the right joystick button again, will enter that menu.

RF CONSTELLATION

RF FEC

RF GUARD INT

CONFIG VIDEO

VIDEO SOURCE

VIDEO FORMAT

VIDEO MODE

ASI ON/OFF

Pressing the button on the left of the LED display, will take you to the top menu level. Scroll down right joystick button and you will see the next menu heading.

CONFIG AUDIO

Press right joystick button for next audio sub-menu

AUDIO SOURCE 1

AUDIO SOURCE 2

AUDIO MODE

AUDIO ENCODER

AUDIO BITRATE

LEFT LEVEL GAIN

RIGHT LEVEL GAIN

2v MIC OPTION

CONFIG DATA

DATA INPUT: (Set to OFF)

DATA BAUD

DATA FORMAT

Pressing the button on the left of the LED display several times, will take you to the top menu level.

Press the right joystick button once and you will see the next menu heading, scroll down the available top menus. Press again, will take you to its sub-menu for settings and changes.

PRESET

There are 16 different preset files. This enables the user to change parameters and save the changes to different files (if wanted). Normally, we would have all the preset parameters match from one to sixteen; the only change from one file to the other would be the frequency.

Then by changing from one preset to another, it becomes very easy to only change the unit's channel. By selecting a different "PRESET" (channel). By pressing the little button on the left of the LED display, will get you to the top menu level.

Using the right joystick button, select PRESET, scroll down once click and you will see the preset number highlighted. Scroll through the highlighted numbers. Stop on the one you want to change by pressing the right joystick button. Highlight will disappear from behind the channel number. Going back to the top menus; CONFIG RF, CONFIG VIDEO and CONFIG AUDIO will allow those parameters to be saved for each preset you selected to change.

PATTERN GENERATOR

CONTROL

Provides Video & Audio test signals

MODE

Visual pattern has moving object
